

Dear Representative of Young Doctors' Communities, thank you for participating in our survey.

We as young doctors provide worldwide the frontline clinical care for COVID-19 patients with an awareness that the vast majority of infected populations is at our age and that the clinical course of the disease among our peers is unpredictable. Given our frequent exposure, lower level of professional experience, and the lack of data on this emerging illness, we may be particularly vulnerable to stress related psychological disorders induced by the COVID-19 pandemic.

Our survey is **DESIGNED BY YOUNG DOCTORS FOR YOUNG DOCTORS** to investigate unexplored aspects of the disease that are relevant to our generation and to present the most comprehensive summary of the emotional burden of the COVID-19 for our Communities.

Young Doctors' Communities all over the world will be united for one common purpose – to investigate the impact of the COVID-19 pandemic and to provide the basis for future improvements in education and work environments.

The survey is anonymous and will take around 10 minutes.

If **you are at the age of 40 or below** and you have worked clinically during the pandemic, **let us know about your situation and express your opinion!**

The project is sponsored by Harefield Hospital, Royal Brompton & Harefield NHS Foundation Trust, London, UK and is officially endorsed by: the Club 30 of the Polish Society of Cardiology, the Young DGK of the German Society of Cardiology, Cardiologists of Tomorrow of the Austrian Society of

Cardiology, the Portugal Society of Cardiology, the Mexican Society of Cardiology, the Romanian Society of Cardiology, the Pink IYAC, the Panhellenic Medical Association.

Important:

Once the questionnaire has started, it is necessary to complete it up to the end in one session. If discontinued, the data will not be saved.

We comply with the European General Data Protection Regulation (GDPR) 2016/679. Any personal data processed in connection with this survey will be treated confidentially and only used for the purposes of the research. Material and data collected from you will be anonymized and analyzed overall. Access to the data will have only the Primary Investigators of the project. The data will be anonymized on the level of questionnaire and collected in the Excel sheet as anonymized one. The data will be kept for a maximum of 24 months for analysis. The Primary Investigators of the project take all reasonable care to prevent any unauthorized access to your personal data. We respect your privacy and your right to access, modify, or suppress your personal data. At any time, you can ask to know what personal data is being held. You have the right to end your participation in this survey at any time.
